

- **Enhancing, supporting actively and improving continuously a quality management system aimed at satisfying the stakeholders' needs as well as the applicable requirements**
- **Adapting performances to customers' requirements**
- **Fostering the development of competences and methods**
- **Making employees, partners and suppliers aware of their contribution to the excellence**
- **Implementing those actions suitable to avoid that errors can occur again**
- **Providing state-of-the-art instruments and technologies for the production and the control**
- **Considering customer satisfaction as the priority parameter for the choices and actions to be taken**
- **Adopting fast and flexible processes with due regard to human values, ethical and integrity principles, regulatory, law, quality and sustainability prescriptions**

The Management Committee has approved the Policy for Quality during the Management Revision on October 16th, 2019.
